

The Light Source

Mega-Baby

The Mega-Baby is designed to allow fixtures that normally mount to a 5/8" pin on a floor stand to be hung from the studio grid. The fixture is mounted onto the Mega-Baby's chrome plated 5/8" x 2-1/2" steel stud. A spring steel 1/8" hairpin safety clip is attached to the clamp with a stainless steel lanyard. The Mega-Square handle is included for fastening the Mega-Baby to the grid without tools.
